SUMMARY

Motivated and curious individual eager to take on challenging and impactful work. Passionate about continuous learning and applying fresh knowledge to solve real-world problems. Known for a proactive mindset, adaptability, and a drive to contribute meaningfully to team success and organizational growth. Committed to expanding skills while delivering tangible value to the company.

work experience

Advanced Blood Donation System Github

Role: Full Stack Developer

- Designed and developed a full-featured online blood donation platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Designed and developed a complete online blood donation platform with user roles (donor, recipient, admin).
- Integrated real-time location filtering and blood group matching features.
- Collaborated with a team using GitHub for version control and task tracking.

FreshCo - E-commerce & Delivery Platform Github

Role: Backend & UI Developer

- Developed core backend logic including admin panel, product listing, and order processing.
- Created user-friendly interfaces and forms with validation for different user roles (manager, driver, admin).
- Managed local server deployment and database design.

Finance Tracker Mobile App Github

Role: Android App Developer

- Built a personal finance tracking app with income/expense logging and category filters.
- Implemented persistent storage using SharedPreferences and file-based saving.
- Created a responsive, user-friendly interface with modern material design components.

Additional Projects

I have developed several other projects covering various technologies and domains. To explore my complete projects, please visit my GitHub:
